

# *Your Pathway to Protection*

## What are GRASSMATS?

**GRASSMATS are the ultimate multipurpose landscape mats.** They cover 5ft X 3.3ft and are made from 30% recycled rubber. They are ideal for protecting any high traffic areas like paths on a golf course during tournament time. They are also useful on construction projects, on playground areas, etc. The ring holes are specially designed to allow grass to grow back through the mats while protecting the ground and maintaining a cool surface for your feet. GRASSMATS are used every day to provide multipurpose and safety surfacing to schools, churches, city parks, recreational complexes, hotels, and tourist attractions. Other uses include ice rinks, snow sports, swimming pool changing rooms, and ski centers. Or, they can be used under swing sets or zip lines, protecting your children and your turf! Then, there are indoor uses, such as behind counters, food service areas, and bars, providing a heavy-duty anti-slip surface.

# GRASSMATS for Playgrounds

*GRASSMATS are the premiere choice for playground flooring. They are a superior alternative to wood mulch, recycled rubber mulch, and even pour-in-place.*

*Grass grows right back through!*

GRASSMATS Playground Safety mats have been engineered to be the safest playground flooring and are a trusted playground flooring option for schools. In fact, many school districts are choosing GRASSMATS because they are cost-effective, easy to maintain, and a much cleaner alternative to wood mulch. The ring design prevents the mats from becoming hot to the point of injury for our children and they are safety tested to comply with **ASTM F1292** and **ASTM F1951** standards.

# GRASSMATS for Golf Courses

*Golf is a sport where making sure the ground is protected at all costs is key—our golf mats are definitely a low-cost solution! Whether it's for your parking, games, or paths, we've got it covered with parking mesh ground protection and grass carpets.*

*Perfect for golf courses & walkways!*

We sell large quantities of these rubber mats to the golf sector every year for tournament preparation and ground protection due to high traffic. They are primarily used for pathways and high traffic areas, such as at the side of tee boxes, providing excellent levels of protection while keeping the natural aesthetics of your course. They are suitable to be driven on by golf carts.

# Other Uses for GRASSMATS

*While GRASSMATS are the superior choice for playgrounds and golf courses, there are a multitude of uses for them:*

Gateway / Swing / Anti-Fatigue / Disk Golf / Gaga Pits / Equestrian / Events  
Kitchen / Walkways / Bridges / Non-Slip / Fitness stations / Boats & Marina

## The GRASSMATS Facts

- 5 Year Guarantee
